HELP YOUR FOREST FIRE WARDEN PREVENT FIRES

IT PAYS!

Prevention is one of the most important phases of all fire effort. This is particularly true of forest fire control work. Preventing forest fires preserves valuable forest growth and other property, conserves man power and permits their use in productive channels, saves taxpayers money and conserves fire fighting equipment.

The prevention of forest fires is the most important and difficult part of the work of your forest fire warden who heads a local organization set up primarily for the security of your community's forest property. Appointed by the State Forester, upon recommendation of the Selectmen he is charged by law with the responsibility of local administration of forest fire laws, fire prevention and suppression. In his work he is aided by deputy forest fire wardens, who in emergency, may assume his power and authority.

The warden is guided in his work by instructions received from the State Forester and by the District Fire Chief who represents the State Forester.

The importance and value of the work of the forest fire warden and his deputies is, perhaps, best appreciated during hazardous periods when fire danger is greatest. The public, however, looks to him at all times for speedy and economical suppression of going fires.

To properly fulfill his mission, the warden needs the generous and understanding cooperation of the public at large. He attempts to secure this cooperation by the posting of caution notices, news items and by word of mouth, always carefully explaining the necessity of restrictions imposed. In the matter of giving cooperation however, the public often fails. The record shows that an average of 7,300 acres of woodland are burned over by forest fires in New Hampshire each year. Analysis of fire causes reveal the fact that more than 98 percent of all forest fires are, consistently, the result of human carelessness and are preventable.

The careless smoker fails to properly extinguish his cigar, cigarette or pipe ashes or thoughtlessly throws them from his car window; the debris burner fails or refuses to consult the warden, as the law requires when the ground is not covered with snow, before attempting to burn; campers fail to properly extinguish their fires or frequently build fires when conditions are unfavorable.

The elimination of human causes from the forest fire problem is the answer. This is not as difficult of accomplishment as it might appear at first glance. Let each one who reads this—

1. Use ordinary common sense with fire in and near woodland

2. Comply with the requirements on the use of fire in and near woodland and, when the ground is not covered with snow, secure written permission to burn from the forest fire warden.

3. Be careful when smoking in or near woodlands. Don't throw lighted material from moving vehicles.

4. Cooperate with and assist the warden and urge others to do so.

5. **HELP YOUR FOREST FIRE WARDEN PREVENT FIRES**—His efforts are only as effective as is the cooperation you give him.

Teachers and Pupils. We were faced with three vacancies in our four regular teaching positions at the close of the year. Mrs. Priscilla Colby was engaged to take the primary grades, succeeding Miss Gertrude Gilman, and Miss Julia Pease was hired to replace Miss Mary Sawyer in the middle grades. Both of these teachers are graduates of Plymouth Teachers' College. The vacancy in the Glenclyff School was filled by Mrs. Elma Howard, replacing Mrs. Flora Palmer. For the position of music supervisor which was so ably conducted for several years by Mrs. Katherine Robb, Mr. Stephen E. Childs of Rumney was selected. This turnover of 75 percent of our staff does not make for good schools. No business could be very successful with an annual turnover of seventy-five percent in its personnel. In order to secure and hold in service competent teachers, we must face the fact that salaries in Warren must be raised sharply as is being done everywhere else.

Buildings and Grounds. During the summer the interior of the village school was painted and screen doors were installed which adds greatly to the comfort of the teachers and pupils in hot months. New chemical tanks were installed at Glenclyff School and this winter one new chemical tank was replaced in the Village School. The other will have to be replaced later. When spring comes the swings at the Village School should be repaired so that they are safe and usable again.

I mentioned last year the advantages that might be gained by transporting the Glenclyff pupils to the Village. This should be kept in mind unless there is an increase in the school population in Glenclyff. Consolidation is the trend in educational policy throughout the country, and the scarcity of teachers lends more weight to the plan.

I wish to express my appreciation to the School Board and the citizens of Warren and to the teachers and pupils for their continued loyalty and cooperation.
